### Profile Summary

---

Passionate and skilled Web Developer with a strong foundation in front-end technologies, including HTML, CSS, and JavaScript. With strong knowledge in React, and I'm now learning PHP I have successfully developed dynamic and responsive websites and applications. I have a solid understanding of web animation and have created engaging user experiences through my projects, such as an animation website and a currency converter app and many more applications. My commitment to staying updated with industry trends and continuous learning is demonstrated by my successful completion of the SMIT, where I achieved high scores in HTML, CSS, and JavaScript quizzes.

Highly accomplished and user-focused Front-end Developer adept in collaborating with UX and design teams to plan the technical writing and execution of functional specifications for websites and applications.
